

Weather Based Irrigation Controller Class

4-station controller
(expandable to 22 stations)
& weather station
Free for attending.

Weather Based Irrigation Controller Class

on Saturday, March 28th , 2015

from 9 a.m. to 11 a.m.

at City of Hesperia Public Works Yard, 17282 Mojave Street, Hesperia

The City of Hesperia Water Conservation Division in partnership with Mojave Water Agency, (MWA) and Alliance for Water Awareness and Conservation, (AWA) is offering Hesperia Water District customers an opportunity to obtain a Weather Based Irrigation Controller (WBIC) . A WBIC is a “smart” irrigation controller that is designed to help you save water by adjusting your irrigation system based on the current weather, making it more efficient.

How to Qualify

- Contact the City of Hesperia Water Conservation Division to register for a class.
- Attend a class to learn how to use the Irrigation Controller.
- Receive one free controller and weather station. *
- Install the controller and weather station.
- Contact the Conservation Division to schedule a site visit to verify installation.

*required for automatic weather based adjustments.
