## 2008 California Energy Efficiency Standards Compliance forms

The Energy Efficiency Standards for Residential and Nonresidential Buildings were established in 1978 in response to a legislative mandate to reduce California's energy consumption. The standards are updated periodically to allow consideration and possible incorporation of new energy efficiency technologies and methods.

California's building efficiency standards (along with those for energy efficient appliances) have saved more than \$56 billion in electricity and natural gas costs since 1978. It is estimated the standards will save an additional \$23 billion by 2013.

The current 2008 standards may be downloaded from the Web pages listed below, or to obtain a hard copy, contact the Energy Commission's publications unit at 916-654-5200.

### **REROOF PERMITS**

Permit submittal CF-1R-ALT (pg. 1-5)

Final CF-6R-ENV-01 (pg. 1-3)

[http://www.energy.ca.gov/title24/2008standards/residential\\_manual.html](http://www.energy.ca.gov/title24/2008standards/residential_manual.html)

### **HVAC CHANGE OUT**

Permit submittal CF-1R-ALT (pg. 1-5)

Final CF-4R-MECH/CF-6R-MECH

CF-1R-ALT forms will specify which CF-4R and CF-6R forms are needed to be filled out by the HERS rater.
